To the EngD Director
School of Computer Science
University of St Andrews

Re: *EngD sponsorship Mr S. U. Pervisor as Industrial Supervisor*

Fluff Products Ltd will sponsor a Research Engineer on the *EngD Computer Science* programme at the University of St Andrews, subject to a contract and a intellectual property agreement. We have no named applicant and wish to engage with the EngD process in order to recruit a new Research Engineer. A separate document (uploaded separately to the EngD site) provides information about the area of research we will be pursuing with the new recruit.

I am happy to recommend and give my support to Mr S. U. Pervisor to act in the role of Industrial Supervisor for the new recruit. Mr Pervisor has over 20 years of experience as a senior engineer, involved in design and research, with experience of mentoring: I am confident that he can fulfil the “Responsibilities and Duties of an Industrial Supervisor” (as listed on your web-site), and has the support of the company in engaging with the EngD programme.

The new recruit and Mr Pervisor will be located at our new lab facilities being set-up in St Andrews, Scotland.

Sincerely;

A. Manager
